What is **Telemedicine?**

Telemedicine is using audio and video secure feed for easy convenience visits anywhere you have access with the internet and smart device. You must be physically in the state in which your provider is licensed. Fast easy visits anytime! Why take the time to drive, park, check in an office with other sick patients and wait for medical care in a cold boring exam room....when you can have comfortable care at home, work, walking your dog, in your car ect.

Care That's Always **There**

We use advanced telemedicine technology to link patients with skilled medical experts.

With online consultations, patients can ask for advice, get diagnoses, and even get prescriptions, all from home.

Our commitment is to bring healthcare to everyone, regardless of location or time.

What Makes Us **Stand Out?**

We offer FDA approved computer ADD/ADHD testing from QB testing. We can do complete care from urgent care needs, mild primary care conditions, stimulant ADHD care, therapy and psychiatry.

We know the importance of understanding each one of our patients' unique history , physical, mental and emotional characteristics.

Keeping this **in Mind**

We conduct a detailed medical assessment that includes a medical history of both physical and mental health to get a deep understanding of your history, concerns, habits, beliefs, lifestyle and goals in a safe, nonjudgmental environment so we can identify the root causes of the issues of symptoms affecting your daily quality of life. We specialize in not only mental health but also urgent care and transitional primary care needs to be able to treat your entire self, not just a singular part of it.

How Does Telemedicine **Work?**

Upon requesting a virtual appointment, your provider will promptly send you a personalized invitation containing a convenient link to access a set of simple online forms.

Once you take the time to fill out these forms and use the provided link, a secure connection with your provider awaits you on the exact date and time you both agreed upon.

There's another plus: you don't have to be right where your doctor is. Even if you're far apart, telemedicine ensures you can still receive the best healthcare.

If you're away from your primary medical provider or specialist, don't worry – telemedicine is like having the care you need right in the comfort of your home.

Exceptional Virtual Services for You and **Your Family**

Expert Online Medical Providers

We have highly skilled online doctors who have graduated from the top medical schools in the USA, with an average of 20 years of experience.

These online doctors offer you and your entire family the reassurance you rightfully expect from your healthcare partner.

Easy Appointments

Schedule a virtual healthcare visit, video chat through your smartphone, and conveniently collect your prescription from your local pharmacy.

Our advanced technology works smoothly with most major health insurance companies, labs, and pharmacies.

The Best Virtual Care

Sickness and injuries can catch us off-guard at the most inconvenient moments. For this reason, we provide a simple solution for receiving health care on your terms for several common health conditions affecting the body and the mind.

Quality Care with **Exceptional Results**

What truly distinguishes us is our commitment to in-depth, personalized care.

At Today Telemedicine, we believe in exploring beyond the surface to uncover the roots of your health challenges. Our services include:

- ✔ Personality assessments.
- ✔ ADD/ADHD evaluations.
- ✔ Blood work.

✔ Genetic testing.

This comprehensive approach provides insights into your unique health profile, which allows us to customize solutions targeting your issues' root causes.

Think of this: someone battling panic disorder who, upon examination, is found to have untreated hypothyroid issues exacerbating their condition. We can identify and treat these interconnected problems more effectively and enduringly because we do meticulous analysis.

Our Telemedicine Services

Testimonials

I've had a lot of difficulty finding good psychiatrists in the past, but Sarah has been no question the best one I've seen in regards to my mental health, period! She always listens and gives valuable advice in regards to my mental state + medications. Her medication recommendations for me have been the best matches compared to everything else I've been prescribed. If you're looking for someone who will make you feel comfortable and your opinions valued, then she is definitely THE best choice!!!!

FAQs (Frequently Asked Questions)

1. What equipment do I need for virtual visits?

2. Will my private information stay safe during online appointments?

3. How do I schedule a virtual appointment?

4. What if I need a prescription?

5. Can I get a sick note or medical certificate through virtual care?
