

How much is certification of an online voting platform important?

It is crucial for an electronic **online voting platform** to secure certifications from authorities to complete the digitization of voting in any elections. Pollbag has already attained the status of a tested and certified voting system under the Government of India. There are numerous layers of authenticated security systems present in electronic voting processes that cannot be breached. Aadhar-based user authentication, code encryption, and real-time audits, as well as instant voting results, are its prime features that make it stand out from other online voting methods. There are many certifications and approvals needed by online election websites from the

Government of India. The online voting system must be tested and approved by a standard testing agency. It is an essential step that ensures full transparency of the entire voting process. Online voting agencies are meant to manage a huge number of university and school elections, local general body elections, housing society elections, alumni elections, and association and club elections every year. Even online opinion polls are the fad of the era where voting for reality shows, game shows, and television and media voting takes place.

Importance Of Certifications in Online Voting Software

We know that you are concerned about the certifications acquired by online voting software to conduct proper and secure elections. The confidence of the voter is the most valuable aspect in the complete channel of opening the link, casting their precious vote, and waiting for the fair result announcement without their data being misused.

But the certifications from high authorities make it a well-built web app that is trusted by voters, business houses, and RWA societies. They do not allow the login information and uploaded data to get leaked. It also safely stores all the information and the vote in a cloud-based environment. Let's count 4 agencies that certify and approve online voting:

GOI (Government of India certification)

The website and online platform for voting must be approved by the Government of India.

STQC (Standardization Testing Quality Certificate Directorate)

It is an agency that approves e-voting. It provides testing, calibration, training, certification, and audit in the area of IT (information technology). Also, it gives quality certification for website quality.

MeitY (Ministry of Electronics and Information Technology)

It promotes e-governance and plays an important role in empowering citizens. It ensures a secure cyberspace for the inhabitants and promotes innovation and R&D. The major role of MeitY lies with enhancing efficiency through digital services in India.

MCA (Ministry of Corporate Affairs)

It is primarily related to the administration of the Company Act 2013. It takes care of Indian companies working in the industrial sector and services. The ministry also approves online voting for company AGM's to make company decisions on a yearly basis.

If you have upcoming elections for your company and you are unsure of using e-voting services, you can learn more about Pollbag by clicking at a link. Pollbag.com

Conclusion

Pollbag is the first choice for upcoming elections in societies, institutions, and companies in the digital era. Here security, 100 percent participation, and the confidentiality of the voter matter a lot in the electoral process.
