# BOLLARD SUPPLIER IN UAE

All our high safety bollards have been checked to ensure a high safety standard. They are hostile vehicle mitigation solutions, securing roads or perimeters from a hostile-minded vehicle while allowing free movement for pedestrians. Being the leading stainless steel bollard supplier UAE, the bollards that we supply in UAE are suitable for places that take into account public attitudes and aesthetics, but still need a high degree of protection. Shopping malls, stadiums, airports, leisure facilities, public areas and urban centers are areas where the effect of static and automated bollards as a protection solution will be considered.
